Apply evenly GUL OVEN CLEANER on oven not above 40°C and leave it to work for 15 - 20 minutes and rinse with water thoroughly as required by FDA for all substances used in food-contact articles.

ODOURISER

CLEAN AIR IDEALISM

Providing a supply of clean, safe, odour free air is a challenge faced by management and maintenance staff.

Some of the key issues faced by maintenance are **odour control**, **tobacco smoking restrictions** and **OH & S compliance** with regard providing healthy clean air for employees, guest and patrons.

Maintaining the hygiene level of the air quality is paramount to providing a healthy clean air environment. Pseudomonas, E.coli, Staphylococcus, Flavobacterium's, Candida, Non Candida and Rhodotorula are some of the bacteria that Isolate within the air, while water and organic material are natural food sources for such moulds and bacteria.
